

**Postoperative multidrug-resistant *Acinetobacter baumannii* meningitis
successfully treated with intravenous doxycycline and intraventricular
gentamicin: A case report**

Xia Wu, Lu Wang, Ying-Zi Ye, Hui Yu

Abstract

BACKGROUND

Multidrug-resistant *Acinetobacter baumannii* (MDRAB) has emerged as an increasingly important pathogen that causes nosocomial meningitis. However, MDRAB-associated nosocomial meningitis is rarely reported in children.

CASE SUMMARY

¹ We report a case of a 1-year-old girl with a choroid plexus papilloma, who developed postoperative nosocomial meningitis due to MDRAB. The bacterial strain was sensitive only to tigecycline and colistin, and showed varying
