**Name of Journal:** *World Journal of Clinical Cases*

**Manuscript NO:** 57142

**Manuscript Type:** CASE REPORT

**Disseminated osteomyelitis after urinary tract infection in immunocompetent adult:**

**A case report**

Young Jun Kim, Jae Hoon Lee

### Abstract

#### BACKGROUND

Urinary tract infection (UTI) is one of the most common bacterial infections. Acute pyelonephritis or upper urinary tract infection is often accompanied by bacteremia;

### [Cervical Spinal Osteomyelitis with Epidural Abscess ...](#)

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6501268>

Spinal epidural abscess (SEA) is uncommon with an incidence reported as 0.33–1.96 abscesses per 10,000 hospital admissions per year. Two-thirds of the cases were caused by *Staphylococcus aureus*. *Escherichia coli* (*E. coli*) is a less common cause of SEA, and it is usually **after urinary tract infection** in patient with preexisting risk factor. A 69-year-old male with a past medical history ...
