<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3668884>

Introduction. **Atraumatic Restorative Treatment (ART)** is an alternative **approach** to manage dental caries. Studies show good performance for single surface **restorations** made with high-viscosity glass-ionomer cements (GIC) and the **ART approach** (1-3). However, the performance of proximal-**ART restorations** is still far from ideal (4-6). An important factor that may contribute to the failure rate of ...
