Primary hepatic myelolipoma: A case report and review of literature

Ke-Yu Li, Ai-Lin Wei, Ang Li

## Abstract

### BACKGROUND

Primary hepatic myelolipoma is a rare hepatic mesenchymal tumor mixed by adipose tissue and bone marrow, and there is a lack of general guidelines related to epidemiology and clinical management.

### CASE SUMMARY

A 26-year-old woman was admitted to our department complaining of a newly found tumor on her left lobe of the liver. The tumor was painless and not associated with any

## Primary mediastinal myelolipoma: a case report and ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5393995>

Oct 11, 2016 · **Myelolipoma** is a kind of rare **benign tumour** composed of mature adipocytes and **hemopoietic** elements, and is most often found in the adrenal glands. **Primary mediastinal myelolipoma (PMM)** more rarely happens and has no definite symptoms, and mediastinal masses are usually found in **chest examination**.

## Primary costal myelolipoma: a case report and review of ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4396243>

**Extra-adrenal myelolipoma** is an uncommon entity. But **myelolipoma** located in the **bone** is extremely rare. We **report a case** of **myelolipoma** occurring in an unusual site: the Costa. It was demonstrated by Computed tomography (CT) scan that an expansive bony mass with heterogeneous low density contents adhered to the 6 th ribs. The mass was successful resected and which was yielded to a bony lump ...

## [Hepatic myelolipoma: A rare entity, case report and ...

<https://pubmed.ncbi.nlm.nih.gov/28935415>

**Hepatic myelolipoma** is a rare entity with only 17 cases described in the **literature**. A 73mm **right liver mass** was fortuitously discovered in a **55-year-old man**. The **biopsy** showed **normal hepatic tissue** adjacent to a normal medular like hematopoietic tissue, showing trilineage hematopoieses, including my ...

## Primary mediastinal myelolipoma: a case report and ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5393995>

Oct 11, 2016 · The **primary myelolipoma** is a rare benign **tumor** with **hematopoietic** and mature adipose tissue composition, which was firstly **reported** by Gierke in 1905 , and named by Oberling in 1929 . **Myelolipoma** is a benign, nonfunctional tumor comprising extensive hematopoietic tissue and sparse fatty tissue.

## MR imaging to detect myelolipomas of the liver: A case ...

<https://insights.ovid.com/medicine/medi/2019/07/...> ▼

**Abstract Rationale:** **Primary hepatic myelolipoma** is a rare benign **neoplasm** comprising mature adipose tissue and marrow components in various proportions. Chemical shift imaging (CSI) can distinguish the lipid within the tumor clearly; however, there have been no **reports** on the CSI of **hepatic**

An abdominal computed tomography revealed a 15.0 × 12.0 cm hypodense lesion in the posterior right lobe of her liver. A right **hepatic lobectomy** was performed, which revealed a well-demarcated lipomatous tumor that **microscopically** proved to be a **myelolipoma**. Our **case** together with 10 other well-documented **cases** showed the median age of the patients as 55 years (range, 40-69), a ...
