Coronavirus Disease 2019 (COVID-19)

<https://www.cdc.gov/coronavirus/2019-ncov/hcp/non...>

Apr 06, 2020 · 3. General Best Practices. In addition to a specific strategy for the identification of suspected COVID-19 cases, there are general best practices that will improve both healthcare worker and inpatient COVID-19 screening.

COVID-19: the Hong Kong Perspective | STS

<https://www.sts.org/.../covid-19-hong-kong-perspective>

Testing of suspected cases also was taken very seriously. Of the 2,726 suspected COVID-19 cases reported up to March 17, 2,395 already have been ruled out from having the infection. In the health care sector, visiting at public hospitals was significantly limited and all visitors were requested to wear surgical masks starting on January 4.
