Paragangliomas and paraganglioma syndromes

https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3341580

Apr 26, 2012 - 1. Introduction. Head and neck paragangliomas (HNP) represent rare tumors of neural crest origin. They are highly vascular neoplasms that are benign in the majority of cases. They may occur along the paraganglia's pathway of embryologic migration extending from the skull base to the pelvic floor. Paraganglia play an important role in organismic homeostasis ...

https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3134809

Cervical paragangliomas are rare tumors of the head and neck of neurovascular origin arising from neural crest cells. Within the head and neck, they are generally defined and named according to the site of origin, including carotid body tumors, jugulotympanic, and vagal tumors. 1 These tumors generally exhibit a slow rate of growth and most often present as a neck mass noted clinically or ...

Aorticopulmonary Paraganglioma With Symptomatic ...

https://www.sciencedirect.com/science/article/pii/S0003497519314365

May 01, 2020 - Mediastinal paragangliomas are rare, with roughly 200 cases reported in literature. Most cases discuss technical considerations for resection, 1 or unusual presentation, 2 but none exist regarding postoperative loss of sympathetic cardiac drive. We present a case in which a 58-year-old man with a nonfunctional aorticopulmonary paraganglioma resection led to symptomatic postoperative ...

Here we report a 24 year old female with familial, bilateral, multiple paraganglioma in the head and neck region, who firstly presented with pulsatile tinnitus and hearing loss in her left ear.

Paraganglioma of the Filum Terminale: Case Report ...

https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4652858

Primary spinal paragangliomas are extremely rare, most frequently involving the cauda equina and the filum terminale [1-2, 4-17]. Legacé, et al. first described them in 1978 in a case report describing a filum terminale lesion with the histologic characteristic of proliferating lobules and sheets of regular cells within a rich vascular network.

Paraganglioma Tumor Causes, Symptoms, Diagnosis, Treatment

https://healthjade.com/paraganglioma

OverviewClassificationEpidemiologyCauseSigns and sy

Paraganglioma (also known as extra-adrenal pheochromocytoma) is a type of noncancerous (benign) neuroendocrine tumor that occurs in autonomic ganglia called paraganglia. Paraganglia are small organs that mainly consist of neuroendocrine cells derived from the embryonic neural crest that have the ability to synthesize and secrete catecholamines [adrenaline, noradrenaline and dopamine] 1). Paragangliomas can aris...

**Abstract**

**BACKGROUND**

Paraganglioma is a rare disease which can be lethal if undiagnosed. Thus, quick recognition is very important. Cardiac paragangliomas are found in patients who have hypertension. The classic symptoms are the triad of headaches, palpitations, and profuse sweating. We describe a very rare case of multiple paragangliomas of the heart
