Aug 05, 2014 · Colonic **duplication** is a rare congenital anomaly that is often diagnosed in childhood, but may go unrecognised until adulthood. It often presents with chronic abdominal pain and constipation, and the preoperative diagnosis may be difficult. We present **a case** of **sigmoid duplication** in a 33-year-old Indonesian woman who presented with right-sided colicky abdominal pain and vomiting.

Tubular sigmoid duplication in an adult ... - BMJ Case Reports

<https://casereports.bmj.com/content/2017/bcr-2017-219474> ▾

Nov 11, 2017 · A 61-year-old man attended an outpatient colorectal clinic for a chronic, non-specific abdominal pain, associated with rectal bleeding. He underwent a number of investigations including a CT pneumocolon, which revealed an incidental finding of 20 cm of additional **sigmoid colon**. This case is interesting because tubular **sigmoid duplication** is an extremely unusual condition, rarely diagnosed ...
