## Scapula fractures

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3702760>

Jan 23, 2013 · Introduction. Although formerly felt to be rare, **scapula fractures** have been shown to occur with a rate of 0.7 % of all **fractures**. Thus, **scapula fractures** occur at rates approaching those of distal tibia and humerus **fractures** [].It is estimated that **scapula fractures** account for 3 %–5 % of all **fractures** about the shoulder girdle, with the most frequent **fractures** encountered occurring in the ...

Oct 05, 2018 · **Merolla** et al reported that altered scapular motion leads to weakened rotator cuff muscles. According to these previous studies, clinical symptoms might worsen due to a double-crush effect on shoulder biomechanics in cases of suprascapular neuropathy combined with rotator cuff injury.
