An atypical presentation of adult-onset Still's disease ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4860549>

Sep 10, 2015 · Pulmonary arterial hypertension (PAH) is a known complication of rheumatologic diseases, but it is only rarely associated with adult-onset Still's disease (AOSD). We describe the case of a 30-year-old woman who presented in a pulmonary hypertension crisis and was found to have underlying AOSD with PAH and nonspecific interstitial pneumonia (NSIP) with a course complicated by macrophage activation syndrome ...

Adult Onset Still's Disease: A Review on Diagnostic Workup ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4794578>

Mar 03, 2016 · After ruling out sickle cell anemia, tuberculosis, and other infectious causes, a diagnosis of adult onset Still's disease was made based on the Yamaguchi criteria. Subsequently, the patient was started initially on high dose prednisone 60 mg PO daily and then methotrexate 10 mg once weekly was added for steroid sparing effect.

Hemophagocytic lymphohistiocytosis in adults

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3713387>

Jul 03, 2013 · I read with interest a recent article by Antonodimitrakakis and colleagues in your journal presenting a case of acquired hemophagocytic lymphohistiocytosis (HLH) in a 60-year-old woman suffering from diabetes mellitus type 2 (1). The reported patient developed a life-threatening HLH associated with a ...
