Totally laparoscopic versus laparoscopic-assisted total ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4815120>

From March 2006 to September 2015, 253 patients with upper and **middle gastric cancer** underwent **laparoscopic total gastrectomy (LTG)**, 145 patients underwent **LATG**, and 108 patients underwent **TLTG**. The **clinicopathological characteristics** and **postoperative outcomes** were retrospectively compared between the two groups.

<https://www.sciencedirect.com/science/article/pii/S1743919119301268>

Totally laparoscopic total gastrectomy (TLTG) is a new technique that has rapidly been gaining popularity, and may help overcome the limitations of LATG; however, its safety and therapeutic **effect** remain controversial. In the present study, we aimed to assess the safety and **efficacy of TLTG**, and **compare** the short-term outcomes of **TLTG** and LATG.
