Monochloroacetic acid is used in low or high concentrations in most European countries for topical treatment of warts. It is a strong organic acid, irritating and corrosive to the skin, leading to burns, and has a high systemic toxicity [65], [66]. In addition to wart treatment, it is used for industrial purposes,...

Systemic treatment **for** severe concentrated sulfuric acid burns in an adult male at high altitude: A case report

Hong-Jin Wang, Ruo-Mei Zhao, Yi Li, Sheng-Wu Chao

### Abstract

#### BACKGROUND

The aim of this study was to report a case suffered from severe concentrated sulfuric acid burns at work in high altitude region and recovered after a systemic treatment, and to make a literature review for better understanding the disease.

#### CASE SUMMARY

A 30-year-old male who was working in a local chemical plant in Xining at an
