Colonic perforation in a nasopharyngeal carcinoma patient treated with fluorouracil: A case report

Wei-Jia Lu, Gong Li, Lei Gao

Abstract

BACKGROUND

Nasopharyngeal carcinoma (NPC) is a commonly encountered type of tumor. Fluorouracil (FU) is an effective treatment providing satisfactory oncologic outcomes in nasopharyngeal carcinoma patients. We describe a unique case of colonic perforation in an NPC patient treated with FU. Thus far, only two reports of intestinal perforation associated with FU treatment have been
