**Mesonephric adenocarcinoma of the uterine cervix with rare lung metastasis:
 A case report and review of literature**

Jiang LL *et al.* MNA of the uterine cervix with rare lung metastasis

Li-Li Jiang, De-Ming Tong, Zi-Yi Feng, Kui-Ran Liu

Abstract

BACKGROUND

Mesonephric adenocarcinoma (MNA) of the female reproductive system is a rare tumor arising from remnants of the mesonephric duct, most of which are located in the cervix. MNA often occurs in adult women. Due to the rarity of the disease and few reports, the specific clinical features have not been established.
