Apr 05, 2019 · Left-sided gallbladder is a relatively rare anatomical variation that is frequently associated with a biliary system anomaly. Here, we describe a case of left-sided gallbladder with acute **cholecystitis** treated by **laparoscopic cholecystectomy**. An 86-year-old man with acute upper abdominal pain was admitted to our hospital. Computed tomography demonstrated that the gallbladder was centrally ...

Laparoscopic subtotal cholecystectomy for difficult cases ...

<https://surgicalcasereports.springeropen.com/...> ▾

Sep 29, 2020 · **Laparoscopic cholecystectomy** (LC) for complicated acute **cholecystitis** (AC) **cases** is associated with a risk of vasculobiliary injuries (VBI) and requires advanced surgical skills. Even if LC is expected to be more useful than gallbladder (GB) drainage, performing it safely is rather challenging.
