## Heart attack (myocardial infarction)

Medical Condition

Death of heart muscle caused by a loss of blood supply.

Very common (More than 3 million cases per year in US)

No vaccine available

Often requires lab test or imaging

Treatment from medical professional advised

Can last several months

Caused by blocked arteries. Symptoms are tightness or pain in the chest, back, neck or arms. Treatment includes procedures, medications and surgery.

### Symptoms

Not all people who have heart attacks have the same symptoms or the same severity of symptoms. Some people have mild pain; others have more severe pain. Some people have no symptoms, while for others, the first sign may be a sudden cardiac arrest.

Following are possible signs and symptoms of a heart attack:

- Crushing chest pain
- Arms may feel heavy
- Shortness of breath
- Coughing
