Colorectal Cancer Survival Rates | Colorectal Cancer Prognosis

<https://www.cancer.org/cancer/colon-rectal-cancer...>

< What Is A 5-Year Relative Su... Where Do These Numbers C... Understand >

A relative survival rate compares people with the same type and stage of **colon** or **rectal cancer** to people in the overall population. For example, if the 5-year relative survival rate for a specific stage of **colon** or **rectal cancer** is 80%, it means that people who have that cancer are, on average, about 80% as likely as people who don't have that cancer to live for at least 5 years after being diagnosed.
