Acinar cell carcinoma is an uncommon type of carcinoma of the pancreas that can exceptionally arise in ectopic pancreatic tissue. Herein, we report a case of a 52-year-old man with pancreatic-type ...

Rare Solid Tumor of the Exocrine Pancreas: A Pictorial Review

<https://www.sciencedirect.com/science/article/pii/S0887217119300289>

Dec 01, 2019 · Acinar Cell Carcinoma. Acinar cell carcinomas (ACCs) represent no more than 1% of all pancreatic tumors. ACCs originate from the exocrine pancreas and usually occur earlier than PDA (reported mean age 56 and 70 years, respectively). 1 More than 50% of patients with ACC present with metastatic disease while 25% present with locoregional invasion.
