**Multidisciplinary diagnostic dilemma in differentiating Madelung's disease: the value of superb microvascular imaging technique. A case report**

Seskute G *et al.* Madelung's disease case report

## Abstract

### BACKGROUND

Madelung's disease, also known as multiple symmetrical lipomatosis, is a rare, under-recognized disorder of fat metabolism that results in an unusual accumulation of subcutaneous fat deposits around the neck, shoulders, upper arms, trunk, hips, and upper thighs. Our case demonstrates the importance of differential diagnosis and the value of superb microvascular imaging technique or suspecting and confirming Madelung's disease. Timely diagnosis and alcohol abstinence could prevent the
