Olfactory neuroblastoma (ONB) is a rare malignant neuroectodermal tumor of the nasal cavity. Berger and Luc first described this uncommon neoplasm in 1924. [ 2 ] Since then, approximately 1200 cases of ONB...

## Olfactory neuroblastoma: A case report

<https://www.spandidos-publications.com/10.3892/ol.2015.3821> ▾

Introduction

Case Report

Discussion

Olfactory neuroblastoma (ON) is an uncommonmalignant nasal tumor which is originated from neuroectoderm. Itcomprises ~2% of all sinonasal tract tumors. Its incidence is ~0.4per million in population (1,2). The most common symptoms of ON areunilateral nasal obstruction (70%), and epistaxis (50%). Othersymptoms include **headaches**, **pain**, **excessive lacrimation**,**rhinorrhea**, **anosmia** and **changes** in vision. ON originates fromolfactory epithelium; however, ON rarely causes anosmia (5%)(3,4).ON ma...
