## Uterine tumors resembling ovarian sex-cord tumor: A case ...

<https://pubmed.ncbi.nlm.nih.gov/30539872>

Abstract. **Uterine tumors resembling ovarian sex-cord tumor** (UTROSCT) are a rare, multi-phenotype **sex-cord tumors**, containing a structure which is characteristic with the trabecular, cord, nests, and false adenoid arrangement. In addition, CD99-positive was a basis for diagnosis of the disease. With uncertain malignant potential and relapse, these patients should be closely followed up.

## Uterine tumor resembling ovarian sex cord tumor. Case ...

<https://www.ncbi.nlm.nih.gov/pubmed/23967565>

A **uterine tumor resembling an ovarian sex cord tumor** (UTROSCT) shows a poly phenotypic immunophenotype with coexpression of epithelial, myoid, and sex cord markers, as well as hormone receptors. The authors present a case of a 59-year-old multiparous woman admitted to the Institute of Gynecology and Obstetrics Clinical Centre of Serbia in January 2010 due to prolonged vaginal bleeding

Introduction: **Uterine tumors resembling ovarian sex cord tumors** (UTROSCT) are uterine neoplasms of unknown histogenesis which show near complete differentiation towards ovarian sex cord elements an...

## Sex cord–gonadal stromal tumour

Symptoms

Diagnosis

Causes

Treatments

Sex cord–gonadal stromal tumour is a group of tumors derived from the stromal component of the ovary and testis, which comprises the granulosa, thecal cells and fibrocytes. In contrast, the epithelial cells originate from the outer epithelial lining surrounding the gonad while the germ cell tumors arise from the precursor cells of the gametes, hence the name germ cell. In humans, this group accounts for 8% of ovarian cancers and under 5% of testicular cancers. Their diagnosis is histological: only a biopsy of the tumour can make an exact diagnosis. They are often suspected of being malignant prior to operation, being solid ovarian tumours that tend to occur most commonly in post menopausal women.
