Incidentally discovered asymptomatic splenic hamartoma misdiagnosed as an aneurysm: A case report

Splenic hamartoma

Abstract

BACKGROUND

Splenic hamartoma (SH) is a rare, benign vascular proliferation that is often found incidentally. It may be misdiagnosed as a splenic aneurysm or splenic malignancy.

CASE SUMMARY

A 21-year-old male patient was admitted to our hospital with a complaint of an

Case report: Unusual presentation of splenic hamartoma ...

<https://www.sciencedirect.com/science/article/pii/S0009926005810037>

Jun 01, 1992 · Most of the previously reported examples of **splenic hamartoma** have been **asymptomatic**. A review of the cases of symptomatic **splenic hamartoma** indicates a female sex preponderance. In these patients, anaemia is a common manifestation, with thrombocytopenia and bone marrow hyperplasia, which were relieved by splenectomy (Iozzo et al., 1980).
