Diploic vein as a newly treatable cause of pulsatile tinnitus: A case report

The diploic vein as a newly treatable cause of pulsatile tinnitus

Abstract

BACKGROUND

Pulsatile tinnitus (PT) is an annoying sound that can be eliminated with targeted treatment of the cause. However, the causes of PT have not been fully elucidated.

CASE SUMMARY

A 38-year-old woman with right-sided objective PT underwent preoperative computed tomography angiography/venography (CTA/V). A 3.8 mm vine diploic vein (DV),
