**Postmenopausal women with hyperandrogenemia: Three cases reports**

Zhu XD *et al.* Steroid cell tumours in postmenopausal women

Xiao-Dan Zhu, Lin-Yu Zhou, Jian Jiang, Tian-An Jiang

## Abstract

### BACKGROUND

Diagnosing hyperandrogenemia in postmenopausal women is very difficult, because it occasionally manifests as excessive hair growth or no clinical manifestations, so it is often misdiagnosed or missed diagnosis. Ovarian steroid cell tumors that cause hyperandrogenaemia in women account for approximately 0.1% of all ovarian tumors. Due to the low incidence, corresponding imaging reports are rare, so ovarian steroid cell tumors lacks typical imaging findings to differentiate it from other ovarian

### Hyperandrogenism in menopause: a case report and ...

<https://fertilityresearchandpractice.biomedcentral.com/...> ▾

May 19, 2015 · **Hyperandrogenism** is an uncommon diagnosis in **postmenopausal women**. In this case, we report on a 69-year-old **postmenopausal woman** who presented with several months of worsening hirsutism of the face, neck, and chin, which was confirmed on examination. Laboratory testing revealed markedly elevated testosterone levels and typical **post-menopausal** gonadotropin levels.
