

## Arthroscopic Autologous Scapular Spine Bone Graft Combined ...

<https://www.sciencedirect.com/science/article/pii/S0749806321001250>

Feb 10, 2021 · For anterior shoulder instability patients with glenoid **bone** loss less than 10%, **Bankart repair** (with or without remplissage) can achieve a low recurrence rate and promising clinical function. 21 **Bony** procedures like Latarjet-Bristow or autologous ICBG is recommended for patients' glenoid **bone** loss >20%.22, 23, 24, 25 But patients with subcritical glenoid **bone** loss between 10% and 15% are common.

## The “Bony Bankart Bridge” Procedure: A New Arthroscopic ...

<https://drmillett.com/the-bony-bankart-bridge...> ▾

### Overview

### Reviews

Arthroscopic treatment of bony Bankart lesions can be challenging. We present a new easy and reproducible technique for arthroscopic reduction and **suture anchor** fixation of bony Bankart fragments. A **suture** anchor is placed medially to the fracture on the glenoid neck, and its sutures are passed around the bony fragment through the soft tissue including the inferior glenohumeral ligament complex.

### Arthroscopic Posterior Glenoid Reconstruction Using a ...

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7917087>

Feb 24, 2021 · Posterior glenohumeral instability is a relatively uncommon cause of shoulder instability, with posterior dislocations accounting for only 5% of all shoulder dislocations.1 Recurrent instability is often associated with glenoid bone loss.2 Unlike anterior instability, the amount of bone loss for posterior instability that requires surgical reconstruction with bone grafting remains a topic of ...

Feb 18, 2019 · The high recurrence rates seen in open and arthroscopic Bankart repair in the presence of significant glenoid bone loss, Hill-Sachs lesions, or combined bony deficiencies have led many surgeons to choose bony reconstructions to manage these injuries. Although the Latarjet procedure has proved to be reliable to manage recurrent anterior shoulder instability, there have been concerns of a ...

Jul 01, 2021 · Glenoid bone loss is one of the most important risk factors for recurrent dislocation after anterior shoulder instability surgery. Authors had reported high postoperative recurrence rate in patients with large glenoid bone loss (>15%) who had been treated with soft tissue repair (Bankart). 1, 2 Bony procedures like Latarjet-Bristow or autologous iliac crest bone graft (ICBG) are recommended ...
