Eli Eliav, in *Current Therapy in Pain*, 2009. Lateral Periodontal Abscess. Pain characteristics of a lateral periodontal abscess are very similar to those of acute periapical periodontitis and usually result from a blockage of a deep periodontal pocket. Acute periodontal abscesses may also be associated with dental ...

Periodontal diseases are one of the most prevalent oral diseases associated with teeth. Our current knowledge suggests that along with local factors, there are many other factors responsible for periodontal disease progression. These include genetic factors and environmental factors like smoking, stress etc. An accurate diagnosis and appropriate
