[Liquid biopsy assessment of synchronous malignancies: a ...](https://pubmed.ncbi.nlm.nih.gov/31555482)

<https://pubmed.ncbi.nlm.nih.gov/31555482>

We herein **report a case** of a patient with independent primary tumours of the **colon** and pancreas, as well as **liver metastases**. All lesions were resected and genotyped revealing KRAS mutations G12C and G12D in the primary tumours, respectively. The G12D mutation detected in the **pancreatic** tumour was retrieved in the **metastasis**, thus confirming ...

[Pancreatic Adenocarcinoma With Synchronous Colonic ...](https://journals.lww.com/acgcr/Fulltext/2020/01000/...)

<https://journals.lww.com/acgcr/Fulltext/2020/01000/...>

Metastases from **pancreatic malignancy** are commonly known to occur in the regional lymph nodes, **liver**, lung, and peritoneum. **Synchronous** or **metachronous metastasis** from the **pancreas** to the **colon** is rare, with only 6 cases reported in the literature. We **report** a man who was found to have adenocarcinoma on biopsies from synchronous lesions in the **colon** and the **pancreas**.
