Is the traditional Chinese medicine helpful for patients with hematologic malignant diseases? **1** A meta-analysis of randomized controlled trials

Cheng-Liang Qian, Fei Yan, Yan-Zhi Song, Dong Li, Ke-Zhou Dong, Yi-Min Zhu

Abstract

10 **AIM:** To evaluate the efficacy of TCM for the treatment of hematologic malignant diseases.

METHODS: We searched the Cochrane CENTRAL, Pubmed, Embase, Web of Science, AMED, CNKI, Wanfang Platform; China Sinomed and the clinical trial registry web sites and Google Scholar electronically up to June 19th, 2014 and hand searched related publications. Only RCTs researching on whether TCM as the adjuvant treatment improved the effect for hematologic malignant diseases were included. Two reviewers extracted data and evaluated the studies independently. Pooled risk ratios (RR) were calculated as outcome measures. Our primary outcomes were the overall response (OR) rate.
