## COVID-19: Implications on Inflammatory Bowel Disease ...

<https://physicians.mountsinai.org/videos/covid-19...> ▾

Mar 24, 2020 · There is increasing evidence that GI symptoms, including nausea, vomiting, and diarrhea, may be among the hallmarks of COVID-19. James F. Marion, MD, interviews Ryan Ungaro, MD, about our current understanding of COVID-19 and the implications for patients with inflammatory bowel disease (IBD).

Location: 1468 Madison Ave, New York, NY 1... Phone: (212) 241-6500

## COVID-19: Implications for Managing Inflammatory Bowel ...

<https://consultqd.clevelandclinic.org/covid-19...> ▾

Mar 30, 2020 · For patients with inflammatory bowel disease (IBD), including ulcerative colitis (UC) and Crohn's disease, the current pandemic situation requires several new considerations. Right now, we do not believe that people with IBD are at greater risk for developing COVID-19, although we have little data.

## Coronavirus (COVID-19) and Inflammatory Bowel Disease ...

<https://www.uchicagomedicine.org/forefront/corona...> ▾

Apr 17, 2020 · Patients with inflammatory bowel disease who develop COVID-19 will have the same symptoms as the general population of patients who don't have IBD: fever, cough, respiratory symptoms (shortness of breath) or new onset diarrhea. Let your doctor know right away if you develop some of these symptoms or if you're worried that you might have ...

## Impact of COVID-19 pandemic on the daily management of ...

<https://journals.sagepub.com/doi/full/10.1177/2050640620929133>

The coronavirus disease 2019 (COVID-19) pandemic is having a major clinical as well as organisational impact on the national health-care system in Italy, particularly in high-volume hospitals which are usually active for many essential clinical needs, including inflammatory bowel disease (IBD).

<https://academic.oup.com/ajcn/article/112/2/251/5860091> ▾

Jun 19, 2020 · The COVID-19 pandemic has **thrown the world into an unprecedented crisis, fighting a pathogen that could well be with us for a long time to come**. As countries lurch from the shock of large-scale lockdowns to a gradual return to normalcy, the transition will be slow and the new normal very different from the past.
