## Listeriosis in Human Pregnancy: a systematic review

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3593057>

INTRODUCTION. Since the 1960s, and following the introduction and widespread use of refrigerators, processed foods, and the extended shelf-life of foods, listeriosis due to ***Listeria monocytogenes*** has become more widespread. Although rare in **pregnancy**, because of the potential for serious feto-maternal consequences, it is important that practicing obstetricians are familiar with the diagnosis ...

## Listeria Infection

Medical condition

Symptoms

Diagnosis

Causes

Treatments

Listeriosis is food poisoning caused by eating foods contaminated with the *Listeria monocytogenes* (*L. monocytogenes*) bacterium.

[WebMD](#)

### Symptoms

The symptoms of listeriosis include fever, muscle aches, and sometimes nausea or diarrhea. If infection spreads to the nervous system, symptoms such as headache, stiff neck, confusion, loss of balance, or convulsions can occur. But infected...

[Read more on WebMD](#)

### Causes

Listeria bacteria can be found in soil, water and animal feces. Humans typically are infected by consuming:

- Raw vegetables that have been contaminated from the soil or from contaminated manure used as fertilizer
- Infected animal meat
