Retrospective Study

Predisposing factors for positive D-Xylose breath test: A retrospective study of 932 patients

Richard A. Schatz, Qing Zhang, Nilesh Lodhia, Jonathan Shaster, Phillip P. Toskes, Baharak Moshirloo

Abstract

AIM: To investigate, in the largest cohort to date, patient characteristics and associated risk factors for developing small intestinal bacterial overgrowth (SIBO) using the D-Xylose breath test (XBT).

METHODS: We performed a retrospective cross-sectional study to analyze patient
