Hemolymphangioma of the spleen: A report of a rare case

Yong Mei, Chuan Peng, Li Chen, Xiong-Xiong Li, Wei-Nan Li, De-Jun Shi,
Wan-Tao Xie

Abstract

Hemolymphangioma is a malformation of both lymphatic vessels and blood vessels. Splenic hemolymphangioma is extremely rare. Herein, we present a case of 62-year-old woman with ambiguous upper quadrant abdominal pain for two months who was found to have an occupying lesion in the spleen on CT. She was eventually diagnosed with hemolymphangioma of the spleen.
