**Association of type 2 diabetes mellitus and the risk of colorectal cancer; a meta analysis and systematic review**

Salman Yousuf Guraya

#### Abstract

**AIM:** Type 2 diabetes mellitus (T2DM) may increase the risk of colorectal cancer (CRC) due to chronic hyperinsulinemia and hyperglycemia. However, the epidemiologic evidence for this association is inconclusive. This article aims to provide a quantitative assessment of the association between T2DM and the risk of CRC.
