Basic Study

Mechanism of givinostat inhibiting hepatic stellate cells proliferation and activation of lysine-acetylated proteins

Yu-Gang Wang, Ling Xu, Ting Wang, Jue Wu, Wen-Ying Meng, Na Wang, Min Shi

Abstract

AIM: To explore the effect of histone deacetylase inhibitor givinostat on related proteins on regulation of the proliferation of hepatic stellate cells.

METHODS: The CCK-8 experiment and flow cytometry were used to observe the changes in proliferation, apoptosis and cell cycle of hepatic
