Unusual presentation of a pancreatic cyst resulting from osteosarcoma metastasis

Burcu Akpinar, Joshua Obuch, Norio Fukami, Sajal S Pokharel

#### Abstract

Pancreatic metastases are uncommon. They have been reported in lung cancer, gastrointestinal malignancies, breast cancer, renal cell carcinoma, melanoma, lymphoma and sarcoma, and usually have solid morphology. Cystic metastasis to the pancreas is even more rare with few case reports in the literature. However, with the increasing use of CT and MRI as well as endoscopic ultrasound, more such lesions may be detected. Metastasis to the
