Peroral endoscopic myotomy for achalasia in patients aged 65 years or older

Chen-Jie Li, Yu-Yong Tan, Xue-Hong Wang, De-Liang Liu

Abstract

AIM: To investigate the safety and efficacy of peroral endoscopic myotomy (POEM) for achalasia (AC) in patients aged 65 years or older.

METHODS: From November 2011 to August 2014, 15 consecutive patients (aged 65 years or older) diagnosed with AC were prospectively recruited and all underwent POEM at our institution. Eckardt score, lower esophageal sphincter (LES) pressure, esophageal diameters, SF-36 questionnaires and
