Local excision by transanal endoscopic surgery

Luis J García-Flórez, Jorge L Otero-Díez

Abstract

Transanal endoscopic surgery (TES) consists of a series of anorectal surgical procedures using different devices that are introduced into the anal canal. TES has been developed significantly since it was first used in the 1980s. The key point for the success of these techniques is how accurately patients are selected. The main indication was the resection of endoscopically unresectable adeno-
