## Adenocarcinoma of third and fourth portions of duodenum: the capsule endoscopy value

Feliciano Chanana Paquissi, Ana Henriqueta Filipe Bunga Pimentel Lima, Maria de Fátima do Nascimento Vieira Lopes, Francisco Viamonte Diaz

### Abstract

Primary adenocarcinoma of the small intestine occurs in over 50% of cases in the duodenum. However, its location in the third and fourth duodenal portions occurs rarely and a diagnostic challenge. The aim of this work is to report an adenocarcinoma of third and fourth duodenal portions, emphasizing its diagnostic

difficulty and the value of video capsule endoscopy. Male, 46 years old, no medical
