Novel 3-dimensional virtual hepatectomy simulation combined with real-time deformation

Yukio Oshiro, Hiroaki Yano, Jun Mitani, Sangtae Kim, Jaejeong Kim, Kiyoshi Fukunaga, Nobuhiro Ohkohchi

Abstract

AIM: To develop a novel 3D virtual hepatectomy simulation software, Liversim, to visualize the real-time deformation of the liver.

METHODS: We developed a novel real-time virtual hepatectomy simulation software program called Liversim. The software provides 4 basic functions: viewing 3D models
