# Xanthogranulomatous cholecystitis: The difficulty in differential diagnosis of gallbladder cancer

Hideki Suzuki, Satoshi Wada, Kenichiro Araki, Norio Kubo, Akira Watanabe, Mariko Tsukagoshi, Hiroyuki Kuwano

**Abstract**

**AIM:** To compare cases of Xanthogranulomatous cholecystitis (XGC) and advanced gallbladder cancer and discuss the different diagnoses and surgical options.

**METHODS:** From April 2000 to December 2013, 6 patients received extended surgical resections. In the same period, 16 patients had proven GB cancer, according to extended surgical resection. Subjects chosen for analysis in this
