**How should immunomodulators be optimized when used as combination therapy with anti-TNF agents?**

Mark G Ward, Peter M Irving, Miles P Sparrow

### Abstract

In the last 15 years the management of inflammatory bowel disease has evolved greatly, largely through the increased use of immunomodulators and, especially, anti-TNF biologic agents. Within this time period, confidence in the use of anti-TNFs has increased, whilst, especially in recent years, the efficacy and safety of thiopurines has been questioned. Yet despite recent concerns regarding the risk: benefit profile of thiopurines, combination
