Role of environmental pollution in irritable bowel syndrome

Mateusz Marynowski, Aleksandra Likońska, Hubert Zatorski, Jakub Fichna

### Abstract

Irritable bowel syndrome (IBS), with the prevalence of 10-20 % of the population has become an emerging problem worldwide. IBS is a functional gastrointestinal (GI) disorder characterized by abdominal pain or discomfort and altered bowel habits. The etiology of IBS contains genetic, psychological, and immunological factors, and has not been fully elucidated; of note, recent studies also point at environmental
