Jadlowiec CC *et al.* Liver transplantation: Current status and challenges

Caroline C Jadlowiec, Timucin Taner

Abstract

Great progress has been made in the field of liver transplantation over the past two decades. This progress, however, also brings up the next set of challenges: First, organ shortage remains a major limitation, and accounts for a large proportion of wait list mortality. While living donation has successfully increased the total number of liver transplants done in Asian countries, the total number of such transplants has been
