Viro-immune therapy: A new strategy for treatment of pancreatic cancer

Ibrahim AM *et al.* Viro-immune-checkpoint therapy for pancreatic cancer

Andrea Marie Ibrahim, Yao-He Wang

## Abstract

Pancreatic ductal adenocarcinoma (PDAC) is an almost uniformly lethal disease with less than 5% survival at five years. This is largely due to metastatic disease, which is already present in the majority of patients when diagnosed. Even when the primary cancer can be removed by radical surgery, local recurrence occurs
