Laparoscopic restorative proctocolectomy with ileal pouch-anal anastomosis for  
Peutz-Jeghers syndrome with synchronous rectal cancer

Zhong ME *et al.* A treatment for Peutz-Jeghers syndrome

Min-Er Zhong, Bei-Zhan Niu, Wu-Yang Ji, Bin Wu

**Abstract**

We report on a patient diagnosed with Peutz-Jeghers syndrome (PJS) with synchronous rectal cancer who was treated with laparoscopic restorative proctocolectomy with ileal pouch-anal anastomosis (IPAA). PJS is an autosomal dominant syndrome characterized by multiple hamartomatous polyps in the gastrointestinal tract, mucocutaneous pigmentation, and increased risks of gastrointestinal and nongastrointestinal cancer.
