Gracient A *et al.* Rendezvous technique for treating biliary fistula

Aurélien Gracient, Lionel Rebibo Richard Delcenserie, Thierry Yzet, Jean-Marc Regimbeau

Abstract

Despite the ongoing decrease in the frequency of complications after hepatectomy, biliary fistulas still occur and are associated with high morbidity and mortality rates. Here, we report on an unusual technique for managing biliary fistula following left hepatectomy in a patient in whom the right posterior segmental duct joined the left
