Metastasis-associated long noncoding RNAs in gastrointestinal cancer:

Implications for novel biomarkers and therapeutic targets

Zhang FF *et al.* Metastasis-associated lncRNAs in gastrointestinal cancer

Fei-Fei Zhang, Yu-Hao Luo, Hui Wang, Liang Zhao

Abstract

Long non-coding RNAs (lncRNAs), a newly discovered class of non-coding RNA molecules, have been widely identified as crucial regulators of various diseases including cancer. More and more studies have demonstrated that lncRNAs are involved in diverse physiological and pathophysiological processes, such as cell cycle progression, chromatin remodeling, gene
