Hepatic encephalopathy: Ever closer to its big bang

Pablo A. Souto, Ariel R Marcotegui, Lisandro Orbea, Juan Skerl, Juan Carlos Perazzo

Abstract

Hepatic encephalopathy is a neuropsychiatric disorder that commonly complicates the course of patients with liver disease. Despite the fact that the syndrome was probably first recognized thousands of years ago, the exact pathogenesis still remains unclear. Minimal hepatic encephalopathy (MHE) is the earliest form of hepatic encephalopathy and is estimated to affect more than 75% of patients with liver cirrhosis. It is characterized by cognitive function
