Therapeutic approaches for portal biliopathy: A systematic review

 Franceschet I *et al.* Portal biliopathy management

Irene Franceschet, Alberto Zanetto, Alberto Ferrarese, Patrizia Burra, Marco Senzolo
Abstract

Portal biliopathy (PB) is defined as the presence of biliary abnormalities in patients with non-cirrhotic/non-neoplastic extrahepatic portal vein obstruction (EHPVO) and portal cavernoma (PC). The pathogenesis of PB is due to *ab extrinseco* compression of bile ducts by PC and/or to ischemic damage secondary to an altered biliary vascularization in EHPVO and PC. Although asymptomatic biliary abnormalities can be frequently seen by magnetic resonance cholangiopancreatography in patients with PC (77%-100%), only a
