**Protons pump inhibitor treatment and lower gastrointestinal bleeding:  
Balancing risks and benefits**

Lué A *et al.* PPIs and risk of lower gastrointestinal bleeding

**Alberto Lué, Angel Lanas**

### Abstract

Proton pump inhibitors (PPIs) represent a milestone in the treatment of acid-related diseases, and are the mainstay in preventing upper gastrointestinal bleeding in high-risk patients treated with nonsteroidal anti-inflammatory drugs (NSAIDs) or low-dose aspirin. However, this beneficial effect does not extend to the lower gastrointestinal tract. PPIs do not prevent NSAID or
