Neutropenic enterocolitis in patients with acute leukemia: prognostic significance of bowel wall thickening detected by ultrasonography

C Cartoni, F Dragoni, A Micozzi... - Journal of Clinical ..., 2001 - jco.ascopubs.org

PURPOSE: Neutropenic enterocolitis (NE) is a severe complication of intensive chemotherapy and is barely identifiable by clinical signs alone. Ultrasonography (US) supports the diagnosis of NE by showing pathologic thickening of the bowel wall. The aim ...

Neutropenic enterocolitis: spectrum of the disease and comparison of definite and possible cases

L Gomez, R Martino, KV Rolston - Clinical infectious diseases, 1998 - cid.oxfordjournals.org

Abstract Twenty-nine cases of neutropenic enterocolitis (NEC) were identified from 1992 to June 1996, and their clinical, microbiological, and radiologic characteristics were reviewed. Eighteen of 29 episodes were considered to be definite NEC since abdominal computed ...
